NGUYEN QUOC TRUNG

Product Management Trainee | Data & Business Analysis

0777961900 | quoctrung121212@gmail.com | Ho Chi Minh City, Vietnam

SUMMARY

Final-year Information Technology student with hands-on experience in data analysis, user behavior analysis and business intelligence. Experienced in translating operational and customer data into actionable insights through Python, SQL and Power BI, with a strong interest in product development, user experience and data-informed product decisions.

TECHNICAL SKILLS

Business Intelligence: Power BI, DAX, Power Query, Excel, Data Visualization

Data Analysis: Python, Pandas, NumPy, EDA, Cohort Analysis

SQL & Data: SQL, T-SQL, SQL Server, ETL, Data Warehouse, Star Schema, Data Quality

Tools: Git, GitHub, Jupyter Notebook

SELECTED PROJECTS

TerraFirm Safety Analytics *2025*

Tools: *Power BI | DAX | Power Query | Star Schema | Deneb*

- Built a 6-page Power BI analytics solution from 9 operational datasets to connect safety outcomes with preventive activity, training readiness and site-level risk.
- Designed a star-schema semantic model and reusable DAX measures covering TRIR, training completion, inspections and a composite Leading Indicator Score.
- Identified a 29 → 16 (~44.8%) decrease in YTD recordable incidents alongside a preventive cadence of only 29.9%, surfacing a gap flagged for further investigation.

SQL Server Data Warehouse *02/2026 – 04/2026*

Tools: *SQL Server | T-SQL | ETL | Star Schema*

- Integrated CRM and ERP source data into a SQL Server data warehouse using a Bronze – Silver – Gold layered architecture.
- Built ETL routines to cleanse, deduplicate and validate raw records before loading into structured fact and dimension tables.
- Implemented data-quality checks across the Silver and Gold layers, delivering an analytics-ready star-schema model for reporting.

Online Ticket Booking — Customer Retention Study *11/2025 – 02/2026*

Tools: *Python | Pandas | EDA | Cohort Analysis*

- Cleaned and integrated multi-table booking datasets in Python/Pandas, resolving missing values, duplicates and inconsistent records.
- Analyzed customer purchase journeys and repeat-purchase behavior using EDA and cohort retention analysis.
- Measured a 13.09% second-purchase rate for promotion-exposed customers versus 12.20% for non-exposed customers, a directional retention signal.

EXPERIENCE

Part-time Sales — Nhện Store *6 months*

Ho Chi Minh City, Vietnam

- Tracked customer orders and sales records in Excel, maintaining monthly payment records and ensuring accuracy and consistency across documentation.

EDUCATION

International University – Vietnam National University HCMC *Expected 2026*

Bachelor of Information Technology
