NGUYEN QUOC TRUNG

Data Analyst Intern

quoctrung121212@gmail.com | Ho Chi Minh City, Vietnam

Portfolio: qtrung-data-portfolio.netlify.app | GitHub: github.com/qtrung123

SUMMARY

Final-year Information Technology student who builds end-to-end analytics projects: cleaning and validating data with SQL and Python, modelling it, and reporting it in Power BI. Seeking a Data Analyst internship to apply these skills to real business data and turn it into insights a team can act on.

TECHNICAL SKILLS

Data & Analytics: SQL, Data Modeling, Data Validation, Data Quality, EDA, Data Cleaning
Programming: Python, Pandas
Visualization & Reporting: Power BI, Excel
Tools: Git, GitHub, Jupyter Notebook

PROJECTS

TerraFirm Safety Analytics (self-directed, public data) 2025
Tools: Power BI | DAX | Power Query

- Built a 6-page Power BI dashboard from 9 operational datasets for KPI monitoring, preventive activity tracking and site-level analysis.
- Developed reusable DAX measures and validation logic to monitor operational metrics and flag abnormal performance patterns.
- Compared a 44.8% drop in YTD recordables (29 → 16) with a 29.9% preventive-cadence rate to highlight sites for follow-up, without claiming a causal link.

Online Ticket Booking — Customer Retention Study 11/2025 – 02/2026
Tools: Python | Pandas | Data Validation | EDA

- Cleaned and integrated 5 raw tables (154,723 transactions) using Python and Pandas, handling missing values, duplicates, invalid dates and inconsistent categories.
- Investigated payment and transaction-quality issues before analyzing customer behavior and retention patterns.
- Ran EDA and cohort analysis on the validated data and compared second-purchase rates of promotion-exposed vs non-exposed customers (13.09% vs 12.20%), reported as a descriptive signal.

SQL Server Data Warehouse 02/2026 – 04/2026
Tools: SQL Server | T-SQL | ETL | Data Validation

- Integrated 6 CSV exports from two source systems (CRM and ERP) into a SQL Server warehouse using Bronze, Silver and Gold layers with structured ETL.
- Wrote SQL quality checks for duplicate/null keys, invalid values, inconsistent records and business-rule violations, run as separate test scripts for the Silver and Gold layers.
- Modelled the Gold layer as a star schema (1 fact view, 2 dimension views) and validated dimension-key uniqueness and fact-to-dimension referential integrity.

EDUCATION

International University – Vietnam National University HCMC Expected 2026
Bachelor of Information Technology

EXPERIENCE

Part-time Sales — Nhen Store 6 months
Ho Chi Minh City, Vietnam

- Tracked customer orders, sales records and monthly payment data in Excel, keeping records accurate and organized for routine operational follow-up.
